

Volunteers Needed

RiverStone Health Emergency Preparedness Drill

- Who:** Anyone of any age can participate
(An adult must accompany children under 14)
- What:** Drill to simulate a public health emergency
- When:** Thursday, April 17, 2014. Come any time between 1 and 3 pm.
(Your participation should take less than 20 minutes.)
- Where:** Skyview High School Lower Gym
1775 High Sierra Blvd., off Wicks Lane, in Billings Heights
- Why:** At RiverStone Health, our job as a public health agency means we must prepare for catastrophic public health events such as disease outbreaks, bio-terrorist attacks and natural disasters.
- In an emergency, we may need to quickly provide medicine to everyone in Yellowstone and Carbon counties, using medical supplies from the Strategic National Stockpile (SNS). People would receive the medicine at local Points of Dispensing (PODS).
- You can help us test -- on a small scale -- our ability to rapidly dispense SNS medication. Volunteers will fill out medical forms, answer a few questions, and receive the mock medication.
- Each participant will walk away with added knowledge, a small gift and a chance to win a grand prize.
- Contact:** Lana at 406.247.3313 or Becky at 406.651.6516.
