Making Choices Activity

How will you invest your resources?

This activity is a great way to explain the tough choices low-income families are forced to make every day.

INSTRUCTIONS:
- Make copies of the “game sheet.” Participants can work in teams of 2 or 3.
- Provide each group with 15 candies (Smarties work well because there are 15 in each roll).
- Tell each participant or team their candies will become symbolic of their “budget” and not to eat their candies until the end of the game!
- Explain that for the purposes of the game each person or team is to pretend they’re married with 2 children.
- One adult in the household is working full-time and the other is working two part-time jobs. Both make minimum wage.
- The family has a limited budget and only 15 candies to spend.
- They have some tough decisions to make.
- Each participant must study their choices in each row and invest their candies with 1, 2 or 3 candies depending on what’s most important to them.
- They cannot skip a row.
- After they’re done making their choices, ask the group how it felt to invest their candies. (Usually the response is, “There weren’t enough candies!”)

UNEXPECTED EXPENSE OCCURS:
- Now tell them there’s been a change. One of their children has a strep throat and has to see the doctor. The family doesn’t have health insurance. In order to get the child the health care the family must give up 2 candies.
- Tell the group to take off 2 candies and adjust the rest as needed.
- Tell them there’s been another change. Their spouse just got laid off with no severance pay. They have to take off 4 candies to adjust.
- Let them go through the exercise of taking off the 4 candies and adjusting the rest.
- After they are done making these choices, ask the group about the choices they had to make and the struggle of making them; also how that felt.
- For continued discussion: ask participants what other things could happen that would force choices; what reactions did they have to this exercise.

Today, many of our family, friends and neighbors are forced to make these tough decisions every day, right here in Yellowstone County. For these hard-working families the basic ingredients for a good life are increasingly beyond their reach. It is shown that these struggles in families affect people’s health, the ability to find and keep employment and the ability of children to do well in school and graduate.
## Making Choices

### How will you invest your resources?

If you had a "15-candy budget" to spend every month how would you spend it? What would your priorities be? Place the required number of candies to indicate your spending choices. You have to make a choice for each category (you can't skip any categories). You are married; you both work and have a son, 14 and a daughter, 9.
